

ShowerGuard™ glass.
Squeaky clean just got easier.

SHOWERGUARD™
FOREVER BEAUTIFUL

Keeping your ShowerGuard glass clean is easy. A soft cloth or wet sponge and most common household cleaners are all you need to keep it looking beautiful. As with all glass, avoid harsh abrasive brushes or cleaners that could scratch the surface.

ShowerGuard glass is covered by a limited 10-year warranty.

For simple care instructions, a list of approved cleaners and warranty information, visit ShowerGuardGlass.com.

SHOWERGUARD™
FOREVER BEAUTIFUL

No matter how hard you try to keep standard shower glass clean, eventually it gets ugly.

ShowerGuard glass is incredibly easy to clean and keep beautiful.

You can scrub your fingers to the bone cleaning standard shower glass, yet it will never be as clean as the day it was installed. That's because hard water, heat, humidity, soap and even cleaning agents can spot, discolor and corrode the surface of the glass. In other words, the things you use to clean your glass can actually make it look worse.

But ShowerGuard glass is a different kind of glass altogether. Its surface is protected during manufacturing through an ionic-bonding process. This patented technology permanently seals the glass surface, stopping corrosion before it starts. Which means with just a minimal amount of cleaning, ShowerGuard glass will always look as gorgeous as it did the day you bought it.

SHOWERGUARD™
FOREVER BEAUTIFUL

Standard glass corrodes, leaving it full of tiny pits and ridges that attract and hold scum.

Hard water, cleaning products and even the soap and shampoo you use every day can take a toll on standard shower glass. Constant exposure to these contaminants causes a chemical reaction that actually roughens the surface of the glass. When that happens, spots, residues, stains and scale build up, and it becomes almost impossible to keep your glass clean.

Magnified standard shower glass showing corrosion after exposure to typical shower conditions.

ShowerGuard glass resists corrosion, so scum has nothing to grab on to.

The surface of ShowerGuard glass is ionically bonded to seal the surface against attack from chemicals and shower contaminants. Which means your glass remains smooth and easy to clean. And unlike spray-on or wipe-on treatments that eventually come off, the coating on ShowerGuard glass is permanent. So your shower stays beautiful forever.
